

martin høft a/s ROLGROS

ABS - Acrylnitrilbutadienstyren

Amorphous plastics results in very fine surface finishes and tolerances.

Certain types are suitable for chrome plating. There are many options to choose from in terms of stiffness, toughness, impact resistant additives such as antistatic, fire retardants etc. Typically used for housings of electronic devices (telephones, mixers, TVs and vacuum cleaners), furniture fittings, handles, keys, etc

Density approx. 1.05 g/cm³.

Can be glued.

Maximum unloaded application temperature approx. 80°C

NOT suitable for outdoor use
