

PA-Recycle-Post Industrial, Polyamid (Nylon)

PA -Recycle - Post Industriel is a very good construction plastic with great strength and toughness. PA records approx. 2% moisture and only has its full toughness when this has happened.

At the same time as moisture is absorbed, a certain dimensional change occurs.

Typically used for adjustable glides, thumb screws, bearings, spacers, sliding blocks, pipe joints, lighting parts, furniture fittings.

This recycled material is approved in relation to Reach and RoHS and SVHC (28.06.2018)

Not suitable for use in connection with acids.

Suitable for use in conjunction with oil.

Maximum operating temperature, unloaded 80° C - short-term 130° C

Able to be glued.

Density approx. 1.5 g/cm³ without filling
